## E2020 Credit Recovery

The Algonac Jr./Sr. High School administration and teachers have had growing concerns about our current E2020 credit recovery. The amount of students using this as an avenue to earn their graduation requirements has increased over time. We feel that this is not the direction we want the students to follow. Students receive a much more enriching and thorough instruction in a classroom with a teacher.

Due to our concerns, we looked at what other schools do. We are currently the only area school that does not charge for their credit recovery classes. See examples below:

School	Credit Recovery Cost
Marine City	\$180 for each semester class
Armada	During the School Year: \$50, During the Summer: \$100 to take at home, \$200 if they come to take it at school
Capac	\$100 per semester class
Yale	\$150 per semester class
Cros-Lex	\$100 per semester class

The high school administration's plan for next year is to begin charging a fee for credit recovery courses. We feel that by putting a financial obligation on the students, they will be less likely to intentionally fail a classroom seat class to take the online recovery.

Students would be able to take their first semester class in their high school career for free. Each additional class after their first during their entire time at Algonac High School would be \$80. If students complete the course in one semester, they would be refunded \$40.

The policy above will begin the fall of the 17-18 school year.
