Well... it has been quite a ride for the Algonac Robotics Roborats FTC team and here are our team results for the 2017 season.

Canton Qualifier (27th)

- Design Award Winner
- Think Award Finalist

Marysville Qualifier (10th)

- Connect Award Finalist

Houghton Qualifier (4th)

- Connect Award Winner
- Inspire Award 3rd Place
- Rockwell Collins Innovate Award Finalist

Michigan State Championship (10th)

- Promote Award Winner

Our performance at the State Championship was very impressive.... We scored the second highest ranking point total during qualification matches worldwide with a total of 1027 points.

Our OPR (Offensive Power Rating) also put us in 34th place out of over 5400 teams registered worldwide.

The road for team to advance in MI is very tough as only 19 teams advance to the Super Regionals. That's why Michigan are so good!

Thank you to all our sponsors and strategic partners for your support.

Special thank you to our coaches, mentors, parent and spouses.... without them, this team would not have this opportunity!
